DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4 and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1 and 21, as amended, require that a packet be stored and transmitted simultaneously by the same device. There is no teaching or support for such a feature of the invention in the disclosure. On the contrary, the specification seems to indicate, for example on page 5 lines 21-22, that the packet is stored prior to being transmitted. The disclosure in the specification does not inherently require simultaneous reception and transmission, nor does it contain an express disclosure of this feature and is thus rejected under 35 USC 112, first paragraph (see Board decision, page 6).
